ABOUT ME

Creative and detail-oriented Information Technology undergraduate with hands-on experience in frontend development, web application development, UI/UX design, and graphic design. Proficient in building responsive, user-centered applications using Next.js, React, Tailwind CSS, and Django REST Framework. Passionate about transforming ideas into intuitive digital experiences through clean design, efficient code, and modern development practices. A fast learner who enjoys solving real-world problems, collaborating with teams, and continuously exploring emerging technologies.

EDUCATION

Bachelor of Engineering in Information Technology

College of Science and Technology, Bhutan

Relevant Coursework: Web Technologies, Software Engineering, Database Management Systems, Data Structures & Algorithms, Human Computer Interaction, Mobile Application Development, Artificial Intelligence, Machine Learning, Cloud Computing.

BHSEC (Class XII - Science)

Ugyen Academy (76.6%)

BCSE (Class X)

Tangmachu Central School (70%)

TECHNICAL EXPERIENCE

Programming Languages

- JavaScript
- TypeScript
- Python
- Java
- Dart

Frontend

- Next.js
- React
- Tailwind CSS

Backend

- Django REST Framework
- REST APIs
- Authentication & Authorization

Databases

- PostgreSQL
- MySQL

Mobile Development

- Flutter
- React Native

Design

- Figma
- Adobe Illustrator
- Adobe Photoshop
- Canva
- UI/UX Design
- Graphic Design

Tools

- Git
- GitHub
- Axios
- Cloudinary
- Render
- Postman
- wordpress

EXPERIENCE

On-the-Job Training (Internship)

Dragon Coders Pvt. Ltd. — Dec 2, 2024 to Feb 21, 2025

Role: Frontend Developer (Next.js)

Developed the frontend of Service.bt, a freelancer marketplace connecting clients and service providers across Bhutan. Collaborated with backend developers to build responsive interfaces, integrate secure REST APIs, and deliver scalable features in a production environment

Key Contributions

- Built responsive and dynamic UI using Next.js, TailwindCSS, Shadcn, Lucide Icons, Zustand.
- Integrated authenticated REST APIs using Axios with token headers.
- Implemented role-based views for Clients, Freelancers, and Admins.
- Designed reusable components to improve development speed and maintainability.
- Collaborated closely with backend developer to ensure smooth integration.
- Improved user experience through clean navigation flows and optimized layouts.

Technologies Used

Next.js, TailwindCSS, Shadcn UI, Zustand, Axios, Django REST Framework, PostgreSQL, Cloudinary, Upstash Redis

Final Year Project - Dzongkha Writing Practice Through Tracing Application

Role: Frontend Developer & UI/UX Designer

Developed an interactive mobile and web-based learning platform designed to help children learn and practice Dzongkha alphabets through guided tracing, visual learning, and gamified experiences. The application focuses on improving accessibility and engagement in Dzongkha language learning through modern digital solutions.

Key Contributions:

- Designed and developed the frontend interfaces for both mobile and web applications.
- Created user-centered UI/UX designs, including layouts, illustrations, icons, characters, and interactive learning components.
- Implemented smooth tracing experiences with guided visual feedback to improve user engagement.
- Designed responsive interfaces and reusable components for consistent user experience across platforms.
- Collaborated with team members to integrate frontend features with backend services and application logic.
- Designed admin dashboard interfaces for content management and monitoring.

Technologies:

React Native, Next.js, TypeScript, Figma, Tailwind CSS, UI/UX Design Tools

Zumtruel VR Game Hall

College Entrepreneurship Project

A VR gaming startup initiative launched after winning the RUB University Business Idea Competition (2021).

Key Contributions:

- Co-founded and operated a VR gaming experience platform at CST.
- Managed VR equipment setup, customer interaction, and event deployment.
- Organized VR gaming sessions during college events and community activities.
- Gained practical experience in entrepreneurship, marketing, operations, and customer management.

Machine Learning & Computer Vision Projects

Developed multiple machine learning and computer vision projects as part of academic and self-learning activities.

Projects Included:

- Diabetes Prediction Models
- Rainfall and Flood Prediction Models
- Image Recognition System

Key Contributions:

- Prepared and processed datasets for machine learning experiments.
- Trained and evaluated predictive models.
- Implemented image processing techniques including preprocessing, feature extraction, and object recognition.

Technologies:

Python, Pandas, Scikit-Learn, OpenCV, CNN, Regression Models

Personal Portfolio Website

Frontend Developer & Designer

Designed and developed a personal portfolio website to showcase projects, design work, and technical skills.

Key Contributions:

- Created modern responsive layouts with animations and interactive elements.
- Designed visual identity and user interface.
- Implemented reusable components and optimized frontend performance.
- hosted on vercel

Technologies:

Next.js, React, TypeScript, Tailwind CSS, Framer Motion, Vercel

Achievements and participation

- Winner, RUB University Business Idea Competition (2021)
- Winner, CST FabLab Logo Design Competition (2021)
- Winner, RUB ACM Student chapter Inter Collegate video contest
- Stanford University Data Science Short Course
- Team Jukar - National space challenge participant
- Eyantra robotics 2022 participant
- GovTech Hackathon (JICA) participant
- Programming Contest Participant
- Makathon Participant
- Ruby on Rails Workshop – Selise Bhutan

Strengths

- Creative Problem Solving
- User-Centered Design
- Collaboration
- Adaptability
- Attention to Detail
- Continuous Learning

Hobbies

- Philosophy, Psychology and cognitive science
- Graphic Design
- Visual Design & Creative Expression
- Fashion and Brand Aesthetics
- History, Culture, and Documentary Exploration
- Travel & Cultural Exploration
